SINCE 1999

## WHEEL LIFTER

Item #  
B-448-P002

The Wheel lift makes light work out of heavy lifting by servicing large, oversize truck and custom wheel that usually require extra effort by the technician. Capacity 300lbs. The lever-controlled wheel lift quickly raises the wheel and a bearing mounted slider positions them for easy mounting. One handed operation means the technician's free hand remains able to control the wheel assembly once it is lifted into the mounting position.
