This Wheel Lifter Is Compatible with All Wheel Balancers !

When working with larger tires adding the integrated **WHEEL LIFT SYSTEM** helps prevent injury and fatigue while increasing productivity.

The Wheel lift makes light work out of heavy lifting by servicing large, oversize truck and custom wheels that usually require extra effort by the technician. Our wheel lift is designed to elevate and support different tire and wheel combinations up to a maximum weight of 300lbs.

The lever-controlled wheel lift quickly raises the wheel and a bearing mounted slider positions them for easy mounting. One handed operation means the technician's free hand remains able to control the wheel assembly once it is lifted into the mounting position.

\$600.00
